The EH216-S distinguishes itself through its autonomous flight capabilities, fully electric propulsion, comprehensive redundancy safety features, and intelligent command-and-control systems for cluster management. These attributes make it an ideal solution for various UAM applications, including air taxi services, aerial tourism, airport shuttles, cross-island transportation, etc.

Notably, the EH216-S made a significant milestone by securing the world's first Type Certificate and Standard Airworthiness Certificate for pilotless passenger-carrying eVTOL aircraft from the Civil Aviation Administration of China ("CAAC") in 2023. This achievement underscores EHang's unwavering commitment to safety and quality, endorsed by a national aviation authority.

By offering a competitive price globally for the EH216-S, the Company aims to meet the escalating demands of international markets and drive widespread adoption of this innovative aircraft. Through enhancing accessibility and affordability of cutting-edge pilotless eVTOL products and services, EHang is dedicated to empowering customers worldwide to embrace the future of transportation and the transformative benefits of UAM.

**About EHang**

EHang (Nasdaq: EH) is the world's leading urban air mobility ("UAM") technology platform company. Our mission is to enable safe, autonomous, and eco-friendly air mobility accessible to everyone. EHang provides customers in various industries with unmanned aerial vehicle ("UAV") systems and solutions: air mobility (including passenger transportation and logistics), smart city management, and aerial media solutions. EHang has obtained the world's first type certificate and standard airworthiness certificate for unmanned eVTOL from the Civil Aviation Administration of China in 2023. As the forerunner of cutting-edge UAV technologies and commercial solutions in the global UAM industry, EHang continues to explore the boundaries of the sky to make flying technologies benefit our life in smart cities.
