EHang Announced Completion of EH216F's Technical Examination by NFFE

July 13, 2021

GUANGZHOU, China, July 13, 2021 (GLOBE NEWSWIRE) -- EHang Holdings Limited (Nasdaq: EH) ("EHang" or the "Company"), the world's leading autonomous aerial vehicle ("AAV") technology platform company, today announced it has successfully completed the technical examination of its EH216F AAV, the firefighting model, by the China National Fire-Fighting Equipment Quality Supervision Testing Center ("NFFE") as entrusted by the Company. The NFFE is a national firefighting equipment quality examination agency under the Ministry of Emergency Management ("MEM") of the People's Republic of China. Its nationwide responsibilities include standards development, centralized management, and technical guidance for firefighting equipment products, including firefighting unmanned aerial vehicles ("UAVs").

The NFFE's technical examination is widely used in the firefighting equipment markets and the MEM system and considered the cornerstone of quality for firefighting products in China. EH216F's successful completion of the technical examination certifies that it conforms to the firefighting UAV standards and requirements by the NFFE and we believe it will further enhance customer confidence and promote the recognition and adoption of EHang's high-rise firefighting solutions in the commercial markets in China and further abroad.

The NFFE conducted a comprehensive 10-month technical examination on EH216F and 52 different types of tests were completed in areas such as flight control functions, hovering and return accuracy, high/low altitude flights, electromagnetic compatibility, wind resistance, high/low temperature adaptability, vibration/shock resistance, radiant heat resistance and smoke performance.

EH216F was officially launched in July 2020. With key advantages in autopilot, quick response and cluster management, EH216F is designed to address pain points in urban high-rise firefighting and become a valuable complement to the existing firefighting system. This firefighting AAV model demonstrates the commercial capabilities of EHang's AAV technology in practical scenarios such as aerial firefighting and emergency rescues.

About EHang
EHang (Nasdaq: EH) is the world's leading autonomous aerial vehicle (AAV) technology platform company. Our mission is to make safe, autonomous, and eco-friendly air mobility accessible to everyone. EHang provides customers in various industries with AAV products and commercial solutions: air mobility (including passenger transportation and logistics), smart city management, and aerial media solutions. As the forerunner of cutting-edge AAV technologies and commercial solutions in the global Urban Air Mobility (UAM) industry, EHang continues to explore the boundaries of the sky to make flying technologies benefit our life in smart cities.
