

EHang Reports Third Quarter 2022 Unaudited Financial Results

- **EH216-S Type Certification in Final Phase**
- **Continued High Quarterly Gross Margin of 65.9%**
- **Partnership with Swire Group's HAECO for Advanced Air Mobility**
- **Continued Flight Demonstrations in Asia and Europe**

Guangzhou, China, December 2, 2022 -- EHang Holdings Limited (“EHang” or the “Company”) (Nasdaq: EH), the world’s leading autonomous aerial vehicle (“AAV”) technology platform company, today announced its unaudited financial results for the third quarter ended September 30, 2022.

Financial and Operational Highlights for the Third Quarter 2022

- **Total revenues** were RMB8.2 million (US\$1.2 million), compared with RMB14.6 million in the second quarter of 2022.
- **Gross margin** was 65.9%, representing a continued high gross margin level with a slight decrease of 1.2 percentage points from 67.1% in the second quarter of 2022.
- **Operating loss** was RMB73.7 million (US\$10.4 million), compared with RMB74.3 million in the second quarter of 2022.
- **Adjusted operating loss¹ (non-GAAP)** was RMB52.9 million (US\$7.4 million), compared with RMB51.2 million in the second quarter of 2022.
- **Net loss** was RMB76.5 million (US\$10.8 million), compared with RMB73.9 million in the second quarter of 2022.
- **Adjusted net loss² (non-GAAP)** was RMB55.1 million (US\$7.7 million), compared with RMB50.8 million in the second quarter of 2022.
- **Cash, cash equivalents, restricted cash and short-term investments balances** were RMB208.8 million (US\$29.4 million) as of September 30, 2022.
- **Sales and deliveries of EH216 AAVs** were 4 units, compared with 8 units in the second quarter of 2022.

Business Highlights for the Third Quarter 2022 and Recent Updates

- **EH216-S Type Certification Updates**

The EH216-S Unmanned Aircraft System (“UAS”) Type Certification (“TC”) process with the Civil Aviation Administration of China (“CAAC”) has progressed into the final phase of Demonstration and Verification of Compliance, after passing through the phases of Concept Design, Requirements Definition, and Compliance Planning.

¹ Adjusted operating loss is a non-GAAP financial measure, which is defined as operating loss excluding share-based compensation expenses. See “Non-GAAP Financial Measures” below.

² Adjusted net loss is a non-GAAP financial measure, which is defined as net loss excluding share-based compensation expenses and certain non-operational expenses. See “Non-GAAP Financial Measures” below.

With all of the certification plans have been officially approved by CAAC, all specified review subjects have been confirmed, including performance and flight, structural strength, design and configuration, ground control station, airborne human-computer interaction, continued airworthiness, etc.

The final phase is specifically to conduct verification reviews through laboratory tests, ground tests and inspections, flight tests, data analysis, in accordance with the approved certification plans. Over the past few years, EH216 AAVs have completed more than 30,000 trial flights, including passenger-carrying trial flights and tests in extreme environments involving high altitudes, typhoons, deserts and heavy fog. The accumulated data, experience and safe records have been compiled to support the demonstration and verification of compliance, and an appropriate number of test flights are being conducted to further supplement and accelerate the completion of the final phase.

In September and November 2022, EHang was invited by the International Civil Aviation Organization (“ICAO”) and CAAC to participate in the ICAO 41st Assembly, 2022 Innovation Fair, and RPAS Symposia Unmanned Aviation 2022 at ICAO’s headquarter in Montréal, Canada, sharing the exploration and practice on the EH216-S type certification project and innovative results with global aviation authorities. In particular, CAAC introduced the Special Conditions for EH216-S as China’s first airworthiness standard for human-carrying unmanned aircraft system at the ICAO 41st Assembly, for other countries’ reference in formulating related regulations, which received positive feedback from aviation authorities from other new regions, such as Latin America and Africa.

- **100 Air Mobility Routes Initiative Updates**

Since the launch of EHang’s 100 Air Mobility Routes Initiative in 2021 to date, EHang has carried out operational trial flights with EH216 AAVs at 15 operation spots in China, where more than 6,800 operational trial flights have been completed in practical scenarios mainly for aerial sightseeing. EHang’s self-developed AAV operational system has been put into trial use for these operation spots and is expected to facilitate AAV operation management efficiency and prepare the operating team for post-certification commercial operations.

- **Partnership with Swire Group’s HAECO for Advanced Air Mobility**

In October 2022, EHang signed a memorandum of understanding regarding the partnership with Hong Kong Aircraft Engineering Company Limited (“HAECO”), a world leading aircraft engineering and maintenance company and a subsidiary of Swire Group. The two parties plan to cooperate in multiple areas such as manufacturing and assembly, continued airworthiness, digital platforms, aircraft maintenance, and talent training. The focus of this partnership is to co-develop systems and solutions that meet the needs of continued airworthiness and after-sales maintenance services in preparation for the EH216 commercial operations.

- **EH216 Flight Demonstrations in 4 Japanese Cities to Mark 1,000-Day Countdown of Expo 2025 Osaka, Kansai**

In July 2022, EH216 AAV successfully completed a demo flight tour across 4 cities in Japan and expanded its footprint for the first time into the Kansai, Kyushu and Shikoku regions after its demo flights in the cities of Okayama and Fukushima last year. Notably, EH216 made an extraordinary appearance on the ceremonial day marking the 1,000-day countdown to the opening of the Expo 2025 Osaka, Kansai. These unmanned EH216 demo flights in Japan included over-the-sea flights as well as point-to-point flights, both believed to be respective firsts for an electric vertical take-off and landing (“eVTOL”) vehicle in Japan.

- **EH216 Flight Demonstrations in Spain under EU SESAR AMU-LED Project**

In October 2022, EH216 AAV successfully completed flight demonstrations in Spain under the European Union (“EU”)’s Air Mobility Urban - Large Experimental Demonstration (“AMU-LED”) project, one of Europe’s largest Urban Air Mobility (“UAM”) demonstration projects. These flight demonstrations verified and validated the UAM Concepts of Operations (“ConOps”) in the furtherance of the AMU-LED project objectives.

- **Participation in EUSPA Project SAMVA for EGNOS Adoption in Advanced Air Mobility**

In November 2022, EHang participated in the SBAS (EGNOS) Adoption in Multicopter VTOL Aircraft (“SAMVA”) project. Under an initiative of the European Union Agency for the Space Programme (“EUSPA”), the SAMVA project is for deploying European Geostationary Navigation Overlay Service (“EGNOS”) on eVTOL aircraft operations, such as EH216 AAVs, to enhance advanced air mobility services and U-Space airspace integration across the continent.

CEO Remarks

Mr. Huazhi Hu, EHang’s Founder, Chairman and Chief Executive Officer, said, “While the unfavorable market impact of the COVID-19 resurgence in China added pressure to our third-quarter results, we made meaningful progress in type certification and other areas that will fuel our long-term growth. Specifically, the EH216-S Type Certification process has entered into the final phase of Demonstration and Verification of Compliance after all the certification plans were officially approved by CAAC. This reflects the diligent work from our team and tremendous support from the aviation authorities and the aviation industry. As we have almost completed the most arduous points in the process, we remain fully confident to complete the world’s first airworthiness certification for the human-carrying unmanned aircraft system. We will continue our efforts to expedite what remains to make it happen as soon as possible.”

“We also entered into a partnership with HAECO for advanced air mobility that addresses the needs of continued airworthiness and after-sales maintenance services in preparation for the EH216 commercial operations. Meanwhile, we continued with more flight demonstrations across Asia and Europe to lay solid foundation for our overseas market development. We remain focused on executing our comprehensive growth strategies. These concentrated efforts, combined with our leading AAV technologies and intelligent command and control systems, empower us to be well-positioned to capture growth when the market recovers from the pandemic resurgence and after obtaining the type certificate.”

Financial Results for the Third Quarter 2022

Revenues

Total revenues were RMB8.2 million (US\$1.2 million), compared with RMB14.6 million in the second quarter of 2022.

Costs of revenues

Costs of revenues were RMB2.8 million (US\$0.4 million), compared with RMB4.8 million in the second quarter of 2022.

Gross profit

Gross profit was RMB5.4 million (US\$0.8 million), compared with RMB9.8 million in the second quarter of 2022.

Gross margin was 65.9%, down 1.2 percentage points from 67.1% in the second quarter of 2022. The decrease in gross margin was mainly due to changes in revenue mix.

Operating expenses

Total operating expenses were RMB80.5 million (US\$11.3 million), compared with RMB86.5 million in the second quarter of 2022.

- *Sales and marketing expenses* were RMB12.7 million (US\$1.8 million), compared with RMB12.2 million in the second quarter of 2022.
- *General and administrative expenses* were RMB36.5 million (US\$5.1 million), compared with RMB39.6 million in the second quarter of 2022. The decreases were mainly attributed to higher professional service fees primarily due to the filing of our annual report and some other legal matters as well as share-based compensation expenses in the second quarter, partially offset by the additional provisions for accounts receivable in consideration of the impact of the continuous COVID-19 epidemic and control measures in China.
- *Research and development expenses* were RMB31.3 million (US\$4.4 million), compared with RMB34.7 million in the second quarter of 2022. The decrease was mainly attributed to the different development processes of new AAV models and the ongoing EH216-S certification process.

Adjusted operating expenses³ (non-GAAP)

Adjusted operating expenses were RMB59.7 million (US\$8.4 million), representing an improvement of 5.9% from RMB63.4 million in the second quarter of 2022. Adjusted sales and marketing expenses, adjusted general and administration expenses, and adjusted research and development expenses were RMB7.9 million (US\$1.1 million), RMB28.8 million (US\$4.0 million) and RMB23.0 million (US\$3.3 million) in the third quarter of 2022, respectively. The decrease in adjusted operating expenses was primarily due to the same reasons discussed under the heading “Operating expenses” above.

Operating loss

Operating loss was RMB73.7 million (US\$10.4 million), compared with RMB74.3 million in the second quarter of 2022.

Adjusted operating loss (non-GAAP)⁴

Adjusted operating loss was RMB52.9 million (US\$7.4 million), compared with RMB51.2 million in the second quarter of 2022.

Net loss

³ Adjusted operating expenses is a non-GAAP financial measure, which is defined as operating expenses excluding share-based compensation expenses. See “Non-GAAP Financial Measures” below.

⁴ Adjusted operating loss is a non-GAAP financial measure, which is defined as operating loss excluding share-based compensation expenses. See “Non-GAAP Financial Measures” below.

Net loss was RMB76.5 million (US\$10.8 million), compared with RMB73.9 million in the second quarter of 2022.

Adjusted net loss (non-GAAP)⁵

Adjusted net loss was RMB55.1 million (US\$7.7 million), compared with RMB50.8 million in the second quarter of 2022.

Adjusted net loss attributable to EHang's ordinary shareholders was RMB54.7 million (US\$7.7 million), compared with RMB50.4 million in the second quarter of 2022.

Loss per share and per ADS

Basic and diluted net loss per ordinary share were both RMB0.66 (US\$0.09). Adjusted basic and diluted net loss per ordinary share⁶ (non-GAAP) were both RMB0.48 (US\$0.07).

Basic and diluted net loss per ADS were both RMB1.32 (US\$0.18). Adjusted basic and diluted net loss per ADS⁷ (non-GAAP) were both RMB0.96 (US\$0.14).

Balance Sheets

- Cash, cash equivalents, restricted cash and short-term investments balances were RMB208.8 million (US\$29.4 million) as of September 30, 2022.

Business Outlook

Due to the continued uncertainties and challenges surrounding the impacts and duration of the COVID-19 epidemic and control measures in China, we have adjusted the annual revenues forecast for 2022 to be in the range of RMB55 million to RMB65 million.

Nevertheless, we remain optimistic and confident in our long-term growth outlook given our leading advantages in AAV technologies and certification process which has reached the final phase, the increasing global UAM market demands, our growing AAV pre-orders, our ongoing preparations and deployment for commercial operations, and the relevant policy support, especially in China.

The above outlook is based on information available as of the date of this press release and reflects the Company's current and preliminary expectations regarding its business situation and market conditions. The outlook is subject to changes, especially uncertainties and situations related to the EH216-S certification process, COVID-19 epidemic and control measures, and global political and economic landscape, etc.

Conference Call

⁵ Adjusted net loss is a non-GAAP financial measure, which is defined as net loss excluding share-based compensation expenses and certain non-operational expenses. See "Non-GAAP Financial Measures" below.

⁶ Adjusted basic and diluted loss per ordinary share is a non-GAAP financial measure, which is defined as basic and diluted loss per ordinary share excluding share-based compensation expenses and certain non-operational expenses. See "Non-GAAP Financial Measures" below.

⁷ Adjusted basic and diluted loss per ADS is a non-GAAP financial measure, which is defined as basic and diluted loss per ADS excluding share-based compensation expenses and certain non-operational expenses. See "Non-GAAP Financial Measures" below.

EHang's management team will host an earnings conference call at 8:00 AM on Friday, December 2, 2022, U.S. Eastern Time (9:00 PM on December 2, 2022, Beijing/Hong Kong Time).

To join the conference call via telephone, participants must use the following link to complete an online registration process. Upon registering, each participant will receive email instructions to access the conference call, including dial-in information and a PIN number allowing access to the conference call.

Participant Online Registration:

<https://register.vevent.com/register/BI2c85c1a84e214dd289b963a4ef393b7c>

A live and archived webcast of the conference call will be available on the Company's investors relations website at <http://ir.ehang.com/>.

About EHang

EHang (Nasdaq: EH) is the world's leading autonomous aerial vehicle ("AAV") technology platform company. EHang's mission is to make safe, autonomous, and eco-friendly air mobility accessible to everyone. EHang provides customers in various industries with AAV products and commercial solutions: urban air mobility (including passenger transportation and logistics), smart city management, and aerial media solutions. As the forerunner of cutting-edge AAV technologies and commercial solutions in the global Urban Air Mobility ("UAM") industry, EHang continues to explore the boundaries of the sky to make flying technologies benefit our life in smart cities. For more information, please visit www.ehang.com.

Safe Harbor Statement

This press release contains statements that may constitute "forward-looking" statements pursuant to the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "aims," "future," "intends," "plans," "believes," "estimates," "likely to" and similar statements. Statements that are not historical facts, including statements about management's beliefs and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from those contained in any forward-looking statement, including but not limited to those relating to EH216 Type Certification, our expectations regarding demand for, and market acceptance of, our AAV products and solutions and the commercialization of UAM services, our relationships with strategic partners, and current litigation and potential litigation involving us. Management has based these forward-looking statements on its current expectations, assumptions, estimates and projections. While they believe these expectations, assumptions, estimates and projections are reasonable, such forward-looking statements are only predictions and involve known and unknown risks and uncertainties, many of which are beyond management's control. These statements involve risks and uncertainties that may cause EHang's actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by these forward-looking statements.

Non-GAAP Financial Measures

The Company uses adjusted gross profit, adjusted operating expenses, adjusted sales and marketing expenses, adjusted general and administration expenses, adjusted research and development expenses, adjusted operating loss, adjusted net loss, adjusted net loss attributable to ordinary shareholders, adjusted basic and diluted loss per ordinary share and adjusted basic and diluted loss per ADS (collectively, the

“Non-GAAP Financial Measures”) in evaluating its operating results and for financial and operational decision-making purposes. There was no income tax impact on the Company’s non-GAAP adjustments because the non-GAAP adjustments are usually recorded in entities located in tax-free jurisdictions, such as the Cayman Islands.

The Company believes that the Non-GAAP Financial Measures help identify underlying trends in its business that could otherwise be distorted by the effects of items of (i) share-based compensation expenses and (ii) certain non-operational expenses, such as provisions for legal proceedings, which are included in their comparable GAAP measures. The Company believes that the Non-GAAP Financial Measures provide useful information about its operating results, enhance the overall understanding of its past performance and future prospects and allow for greater visibility with respect to key metrics used by its management members in their financial and operational decision-making.

The Non-GAAP Financial Measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The Non-GAAP Financial Measures have limitations as analytical tools. One of the key limitations of using the Non-GAAP Financial Measures is that they do not reflect all items of expense that affect the Company’s operations. Share-based compensation expenses have been and may continue to be incurred in the business and are not reflected in the presentation of the Non-GAAP Financial Measures. Further, the Non-GAAP Financial Measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited. The Company compensates for these limitations by reconciling the Non-GAAP Financial Measures to the nearest U.S. GAAP measures, all of which should be considered when evaluating the Company’s performance.

Each of the Non-GAAP Financial Measures should not be considered in isolation or construed as an alternative to its comparable GAAP measure or any other measure of performance or as an indicator of the Company’s operating performance or financial results. Investors are encouraged to review the Company’s most directly comparable GAAP measures in conjunction with the Non-GAAP Financial Measures. The Non-GAAP Financial Measures presented here may not be comparable to similarly titled measures presented by other companies. Other companies may calculate similarly titled measures differently, limiting their usefulness as comparative measures to the Company’s data. The Company encourages investors and others to review its financial information in its entirety and not rely on a single financial measure.

For more information on the Non-GAAP Financial Measures, please see the table captioned “Unaudited Reconciliations of GAAP and Non-GAAP Results” set forth at the end of this press release.

Exchange Rate

This press release contains translations of certain RMB amounts into U.S. dollars (“USD”) at specified rates solely for the convenience of the reader. Unless otherwise stated, all translations from RMB to USD were made at the rate of RMB7.1135 to US\$1.00, the noon buying rate in effect on September 30, 2022 in the H.10 statistical release of the Federal Reserve Board. The Company makes no representation that the RMB or USD amounts referred to in this press release could have been converted into USD or RMB, as the case may be, at any particular rate or at all.
